

## Redesigned NJTA Web site provides new tools for customers

WOODBIDGE, March 29 -- The New Jersey Turnpike Authority today launched a redesigned [Web site](#) that provides new tools for customers planning trips on the Turnpike and the Garden State Parkway and easy public access to a trove of financial information and other data about NJTA's operations.

The features of the new site include:

- Real-time traffic alerts and a map of traffic conditions on the [home page](#). These features are fed by the New Jersey 511 system.
- A [clickable map](#) with information about amenities available at the 23 service areas on the Turnpike and Parkway.
- Up-to-date information about the [cost of gasoline and diesel fuel](#) at our service areas.
- Links allowing customers to [access their E-ZPass accounts](#) or sign up to [receive 511 traffic alerts](#) by text message.
- Forms for reporting pot holes and other maintenance complaints.
- A "[Newsroom](#)" where customers will read announcements that could affect their trip on our roadways.

With the redesigned site, the Turnpike Authority also reaffirms its commitment to transparency. The site makes a wealth of public information about our operation easily accessible to customers, investors and any other interested member of the public.

This information includes [audited financial reports, annual reports, traffic and revenue statistics, accident statistics, the annual Strategic Plan Update, a clickable map with the location and description of capital projects, historical information about the Turnpike and Parkway and short bios of commissioners and top executives](#). Every action taken by the Board of Commissioners since August 2007 is recorded in the [meeting minutes](#) posted on the site.

In the coming months, the NJTA plans to add additional features, including a new toll rate calculator and expanded access to traffic cameras.
